Course Description

The course introduces students to the broad survey of the Western philosophical tradition. Special attention will be given to enduring philosophical issues including, but not limited to, the nature of reality and knowledge, the existence of God, the mind/body problem, freewill and determinism, the problem of valuing, and ethics.

Objectives

1. Students should learn the basics of sound philosophical thinking and argumentation as well as develop some basic skills in philosophical writing.
2. Students should learn the classical philosophical positions regarding metaphysics, epistemology, and axiology.
3. Students should gain a familiarity with some of the more prominent historical contributors to the Western philosophical tradition.
4. Students should develop an appreciation for the invaluable contribution that philosophy has made to other disciplines and fields such as science, politics, law, education, etc.
